Title: ALP PLSS coverage of the Coeur D' Alene National Forest, Idaho

Edition: 1.0

Geospatial_Data_Presentation_Form: atlas

Publication_Information:

Publication_Place: Missoula, MT

Publisher: Northern Region (R1), USDA Forest Service

Description:

Abstract:

This coverage contains Public Land Survey System information for the Coeur D' Alene National Forest, in the panhandle of Idaho. The data is arranged into 2 region subclasses (themes): TOWNSHIPS SECTIONS. The land net portrayed is based upon the BLM Geographic Coordinate Data Base (GCDB).

Purpose:

The purpose of this coverage is to provide a standardized base layer of Townships and Sections for U.S. Forest Service GIS applications. It is a by-product the Forest Service Automated Lands Project. This project is the conversion of the Forest Service's hard-copy Land Status base maps and associated LOS database to Arc coverages with an associated Oracle database. The resulting ALP product will provide tools to display and update land survey and land ownership information for Forest Service lands specialists, planners and land managers.

Supplemental_Information:

***** Spatial Reference Information (Beg) *****

Projection Parameters Projection: Geographic Datum: NAD27 Units: Decimal Degrees Spheroid: CLARKE 1866

Spatial Information Vector: Scale of original/hardcopy map: 1:24000 Feature Type: region
Attributes: TOWNSHIPS subclass: 3 user attributes: town_code - a ten digit character string, in which fields 1-3 are the township number (integer), field 4 is the township fraction, field 5 is township direction, North or South of the Baseline, fields 6-8 are the range number (integer), field

9 is the range fraction, field 10 is the range direction, East or West of the Principal Meridian. mer - a two digit number identifying the Principal Meridian. townships_id - a random number used to link to the Oracle records. SECTIONS subclass: 2 user attributes: section - the section number, usually 1-36, but 3 digits are provided. sections_ID - a random number used to link to the Oracle records.
