

Fire Safety Refresher Training for Contractors

Important Note: Effective February 9, 2010 CAL FIRE has changed their policy on fire refresher training. CAL FIRE will only recognize fire refresher training that has been put on by CAL FIRE, the Forest Service or an accredited Community College. The private training providers that had planned to provide the training, have been removed from the list of approved training providers. If you booked a class from one of the private providers you will need to contact that private training provider to cancel; the contact information is provided on page 2.

For information on CAL FIRE classes contact your local CAL FIRE unit or contact one of the Community Colleges listed below. Additional colleges are in the process of being signed up.
