Subject: 2009 Fire Management Plan Interim Direction

To: KLT, Kaibab NF

The following interim direction will provide guidance for the 2009 fire season until the review and update of the 2008 Fire Management Plan:

- Use the “Guidance for Implementation of Federal Wildland Fire Management Policy” (February 13, 2009) document to provide direction for wildland fire management decisions. This document replaces the Interagency Strategy for the Implementation of Federal Wildland Fire Management Policy (June 20, 2003).

This document primarily contains terminology changes. It also identifies the Wildland Fire Decision Support System (WFDSS) as the process used to document fire managers’ and line officers’ decisions.

Enclosed you will find a copy of the Implementation Guide.

If you have any questions, please contact Dave Mertz at 928/635-8340.
