### **CHR Motorized Route and Area Designation Project Decision** **on Hungry Horse-Glacier View District**

Hungry Horse–Glacier View District Ranger Jimmy DeHerrera recently made a decision designating motorized use within several geographic areas on the district following an environmental assessment for the CHR Motorized Route and Area Project. The geographic areas that will have site-specific motorized use designations are:

- Cedar Flats (north of Columbia Falls),
- Hungry Horse Reservoir (nine specific locations),
- Hungry Horse Track (adjacent to Hungry Horse Ranger Station Administrative Site),
- Wild and Scenic River Corridor (North Fork and Middle Forks of the Flathead River), and
- Flathead River (Pioneer and South Fork Access Sites).

DeHerrera said, “We appreciate the public comments we received on this project. I believe this decision responds to the issues; maintains motorized recreation opportunities in important recreation areas and sites, while minimizing impacts to other resources and providing a safer environment for all users within this forest-urban interface landscape.”

More information regarding the CHR Motorized Route and Area Project Decision can be obtained at [www.fs.fed.us/r1/flathead](http://www.fs.fed.us/r1/flathead), clicking on projects and plans, projects, or by contacting Planning Team Leader Michele Draggoo at 406-387-3827.
