

**2010 Annual Operating Instructions  
Goat Creek On-Off C&H Allotment**

**1: INTRODUCTION:**

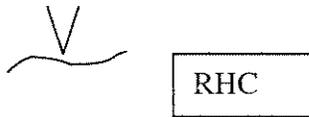

**Permitted Use:**

<b>Permittee</b>	<b>Numbers</b>	<b>Season</b>
Stanley Ranch LLC (Welp) #4545	18 cow/calf "On", 100 cow/calf "Off"	06/11-09/30

**Authorized Use:** Upon payment of fees, you are authorized to graze as follows:

<b>Permittee</b>	<b>Unit</b>	<b>Numbers</b>	<b>Season</b>
Stanley Ranch LLC (Welp) #4545	North Pasture	18 cc "On"	06/11-07/31
	Middle Pasture & South Pasture	100 cc "Off"	08/01-09/30

**Permitted Livestock Brand**

**2: COMPLIANCE:**

This AOI is made part of your Term Grazing Permit consistent with Part 1, Item 3 and Part 2 Item 8(a) of the General Provisions and Requirements. Your compliance with these instructions is essential for the proper management of National Forest System lands. Failure to comply with the terms and conditions of your permit and these instructions may result in issuance of a notice of non-compliance with the terms of your grazing permit.

Permittees with livestock in rested units, grazing units outside the season of use, and grazing areas not authorized, will be held non-compliant with the terms and conditions of their Term Grazing Permit. Such non-compliance may result in billing for excess use, permit modification / cancellation, or other actions as provided in FSH 2209.13.

Situations may develop during the grazing season which require modifications to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact the District Ranger and obtain approval before initiating changes or deviating from these instructions.

Notice of non-compliance actions: None taken in 2009

All livestock feed or straw brought on to the forest is required to be certified weed free.

**3: PREVIOUS YEAR GRAZING RESULTS:**

Ocular estimates made during various pasture inspections indicate that compliance with utilization standards was achieved for the 2009 grazing season. Pasture moves were timely.

**4: BILLING:**

The 2010 grazing year rate for cattle is \$1.35 per head month. A Bill for Collection will be mailed to you.

Grazing fees must be paid to **USDA Forest Service PO Box 894183 Los Angeles, CA 90189-4183** by the date specified on the Bill for Collection.

Confirmation of payment through the "lock box" process must be received before livestock can enter NFS lands.

**5: LIVESTOCK MANAGEMENT:**

2010 Rotation:

Unit	Numbers	Season
North Pasture	18 cc "On"	06/11-07/31
Middle & South Pasture	100 cc "Off"	08/01-09/30

\*When utilization is met in each unit, cattle are to be moved on to the next unit.

Actual on-dates, off-dates, and grazing rotations will be determined on the basis of range readiness, utilization, or other resource considerations as deemed necessary by the authorized Forest Officer. Such changes will typically be made in consultation with the permittee(s).

**You will be responsible for monitoring livestock move thresholds or "triggers" during the grazing season.** These "triggers" will assist you in ensuring that end of season utilization standards are not exceeded. The Sawtooth NRA range staff will conduct spot checks as necessary. Typically, "triggers" will be the standard(s) listed below in section 6, "Standards and Guidelines". **It is strongly suggested that livestock be moved before utilization standards are reached.** This will help to prevent forage utilization in excess of standards, allowing for time to clean the unit of stragglers.

**The scheduled "off-date" is not the day to start moving your herd; it is the date by which you must have all permitted livestock removed from the pasture or allotment.**

If you move your permitted livestock on to the allotment later than the scheduled "on-date", and want to stay past your "off-date", then you must make arrangements early in the grazing season, and obtain approval from the District Ranger or other authorized Forest Officer.

Please realize that it is in your best interest to keep cattle distributed throughout useable areas in the currently authorized pasture. **Use of riparian areas needs to be carefully monitored by you.** If cattle are allowed to concentrate in riparian areas and around water developments, utilization standards will likely be reached prior to the scheduled pasture move or "off-date". This may result in directed early pasture moves or early removal of livestock from the allotment.

**6: STANDARDS AND GUIDES:**

The following restrictions apply to this allotment:

- Cattle in Pasture #4 (North Pasture) will be removed by August 15 to avoid impacts to chinook spawning in Valley Creek, (Permit Issuance EA for On-Off Cattle Allotments-1996), or public lands with federally permitted livestock will be excluded from grazing with a temporary or permanent fence.
- If livestock remain on the Middle Unit (Middle Pasture) after the permitted “off-date”, the permittee must erect an electric fence by Sept 30 to exclude the federal land.

You are responsible for tracking forage use levels and complying with utilization standards. For your convenience, the Goat Creek C&H maximum allowable forage utilization levels under the Sawtooth FLRMP are listed below.

Riparian Areas:

Allotment	Unit	Season	Creek	Utilization Standard*
Goat Creek	North Pasture	06/11-09/30	All Creeks	4"
	Middle & South Pasture	06/11-09/30	All Creeks	4"

\*Water sedge (*Carex aquatilis*) or Nebraska sedge (*Carex nebraskensis*) will be the key species measured to determine riparian (greenline) utilization.

Upland Vegetative Cover Types:

Allotment	Unit	Season	Vegetative Type	Utilization Standard**
Goat Creek	All Units	06/16-09/30	Sagebrush/Fescue	40%

\*\* Bluebunch wheatgrass (*Agropyron spicatum*) and Idaho fescue (*Festuca idahoensis*) will typically be the key species measured to determine upland utilization, though other species may be may be measured to estimate utilization at the discretion of the Forest Officer.

**7: IMPROVEMENTS:**

All improvements for which you have maintenance responsibility are listed in Part 3 of your Term Grazing Permit.

Range improvements that require specific maintenance in 2010 are: #49000 and 49003 which are shown on page 11 of your Term Grazing Permit. Please pay particular attention to make sure that repairs are still functional.

**Improvements will be maintained to Forest Service standards before livestock enter the pasture/allotment.**

When improvements have been maintained, please call the Stanley Ranger Station and report that maintenance has been completed. If verification is not received from the permittee prior to the allotment “on-date”, follow-up inspections may be made. If it is found that maintenance has not been completed, and the responsible permittee’s livestock are present on the allotment, the permittee may be billed for unauthorized use and / or permit action taken for non-compliance.

If an allotment is in non-use status, the permittee is still responsible for improvement maintenance.

Improvements used in common with an adjoining permittees, such as allotment boundary fences, must be maintained to standard before either permittee allows livestock to enter the allotments.

No ground disturbing activities may be conducted by the permittee or their personnel on National Forest System lands without prior approval from the authorized Forest Officer.

Any plans to reconstruct or build new improvements on the Forest should be coordinated with the range staff.

#### **8: PERMITTEE OR RIDER INSTRUCTIONS:**

Please notify SNRA range staff at 208-774-3000 before allowing your livestock to enter the Goat Creek C&H On-Off Allotment.

Because of increasing public use, gates are often left open and cattle stray into the wrong pasture. We realize this is an inconvenience. However it is still the **permittee's responsibility to keep their permitted livestock in the approved pasture/allotment.** Routine checks should be made by you and your rider to assure compliance.

Salt should be used to spread livestock utilization across the pasture being grazed. The permittee is responsible for using water and salt to achieve the best distribution of cattle throughout the pasture.

**Livestock salting is prohibited within riparian areas and wetlands.** Do not place salt within 100 yards of any watering area or meadow unless you receive prior approval. This includes, but is not limited to, springs, seeps, water troughs, and creeks.

Salt will be removed from areas where the maximum allowable use levels have been reached or at the end of the grazing season, whichever occurs first.

By USDA order #04-00-097, all non-pelletized hay, straw or mulch possessed, stored, or transported on National Forest System Lands, in individual bales or containers, must be tagged or marked as weed free, or must have the original and current evidence of weed free certification documentation present. All markings must meet State and/or County standards for certification as weed free.

#### **9: REQUIRED REPORTING:**

Enclosed is a grazing use record form for the upcoming season. Please use this form to record the time (dates) livestock spend on an allotment as well as other information such as livestock loss, salting, grazing use, resource concerns, improvement needs etc. The grazing use record should be returned to the district office within 30 days after the grazing season.

Please submit requests for credits or refunds before December 31.

#### **10: INSPECTIONS & MONITORING:**

Brands will be checked periodically throughout the grazing season.

Range inspections may be made several times during the grazing season to check maintenance of

range improvements, forage utilization, and compliance with the grazing rotation and standard requirements. If you are interested in participating in allotment inspections, please notify the range staff at the beginning of the grazing season.

End-of-season compliance monitoring will be conducted by the SNRA Range Staff. Exceeding end-of-season utilization standards will be regarded as an instance of non-compliance with the terms of your grazing permit. In addition to the potential for permit action, this may further result in the modification of grazing management (including reductions in Head Months or permitted area) until the risk of adverse impacts to habitat is minimized.

#### **11: COORDINATION & COOPERATION:**

Questions about what can or cannot be done in reference to defending flocks, harassing wolves, or shooting wolves should be directed to Steve Nadeau at the Idaho Department of Fish and Game (IDFG) Headquarters Office in Boise, Idaho (208-334-3700); Todd Grimm, USDA APHIS Wildlife Services in Boise, Idaho (208-378-5077); or local Wildlife Services contacts. Permittees should continue working with their local Wildlife Services representative on depredation issues.

In order to reduce the potential for depredation, the Forest Service recommends that the following procedures be implemented each grazing season:

- Keep camp meat in coolers, and not hung.
- Burn, bury, or pack out food leftovers, bones, garbage etc. including food not consumed by dogs accompanying the herders.
- Bury or remove sheep and saddle stock carcasses from the area where they will not serve as an attractant to predators. The intent of this recommendation is not to require removal of carcasses from the allotment, but to remove them out of areas currently being grazed of areas soon to be grazed.
- Work with IDF&G and Wildlife Services in implementing other effective preventative actions to reduce the risk of depredation.

Contact the range staff at the Stanley Ranger Station (208-774-3000) for local Wildlife Services contact information.

#### **12: OTHER:**

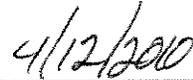

We look forward to working with you and solicit your cooperation and involvement in bringing about sound range and livestock management practices that will enhance all of the allotment's resources. If you have any ideas or suggestions that will improve the management of this allotment, we would like to hear from you. If you have any questions concerning these Annual Operating Instructions, please call Dave Cottle, Beth Bratlie or myself at 208-774-3000.
