

ROUTT NATIONAL FOREST

Administrative Correction 2 – February 16, 2007

Administrative corrections are defined at 36 CFR 219.7(b) and may be made at any time and are not plan amendments or revisions.

Administrative corrections include the following: (1) Corrections and updates of data and maps, (2) Corrections of typographical errors or other non-substantive changes; (3) Changes in the monitoring program and monitoring information (4) Changes in timber management projections; and (5) Other changes in the Plan Document or Set of Documents, except for substantive changes in the plan components.

(36CFR 219.7(b)(2)) Non-substantive changes:

The Routt National Forest Land and Resource Management Plan included direction for the Williams Fork area (104,744 acres) of the Arapaho-Roosevelt (AR) National Forest. This administrative correction removes that direction for all the references to the Williams Fork area from the Routt Forest Plan (see following table) and transfers the area and direction for it back to the Arapaho-Roosevelt National Forest. By removing this direction, there is no change occurring to forestwide goals, objectives or standards and guidelines.

During development of the Routt Forest Plan separate S-Tables were built for both the Williams Fork area and the Routt area (Routt NF with no Williams Fork included), in preparation for transferring the Williams Fork area back to the AR. Since the volume of the ASQ is small compared to the total amount, no change for ASQ is necessary.

Note: Since the Williams Fork acres were included in many summary numbers for use in the Routt Forest Plan it would be impractical to recalculate all those summaries and so summary numbers used in the Routt Forest Plan may still contain acres from the Williams Fork area.
