The natural forces that formed the Uinta Mountains are evident in the panorama of geologic history found along waterways, roads, and trails of the Ashley National Forest. The Uinta Mountains, punctuated by the red rocks of Flaming Gorge on the east, offer access to waterways, vast tracts of backcountry, and rugged wilderness.

The forest provides healthy habitat for deer, elk, mountain goats, bighorn sheep, and trophy-sized trout. Flaming Gorge National Recreation Area, the Green River, High Uintas Wilderness, and Sheep Creek National Geological Area are just some of the popular attractions.

Fast Forest Facts
- **Elevation Range:** 6,000’-13,328’
- **Unique Feature:** The Uinta Mountains are one of the few major ranges in the contiguous United States with an east-west orientation
- **Annual Precipitation:** 15-60” in the mountains; 3-8” in the Uinta Basin
- **Lakes in the Uinta Mountains:** Over 800
- **Acres:** 1,382,347

Fish the lakes and rivers; explore the deep canyons and high peaks; and marvel at the ancient geology of the Ashley National Forest!
Get to Know Us

History

For at least 8,000 years, native people have hunted animals, gathered plants for food and fiber, and used stone tools and other resources to make a living. This was the lifestyle of the Ute Indians when European explorers and settlers arrived.

In 1825, William Ashley (after whom the forest is named) explored the area in buffalo hide boats. However, the most famous explorer was John Wesley Powell who led two expeditions down the Green River in wooden boats. On May 26, 1869, Powell named a particularly spectacular red rock cliff face “Flaming Gorge.”

The Uinta Mountains were named for early relatives of the Ute Tribe. Sapphix and son, Ute, 1869 photo courtesy of First People History.

Over 8,000 years, native people have hunted animals, gathered plants for food and fiber, and used stone tools and other resources to make a living. This was the lifestyle of the Ute Indians when European explorers and settlers arrived.

In 1825, William Ashley (after whom the forest is named) explored the area in buffalo hide boats. However, the most famous explorer was John Wesley Powell who led two expeditions down the Green River in wooden boats. On May 26, 1869, Powell named a particularly spectacular red rock cliff face “Flaming Gorge.”

The first Anglo settlement on the Uinta Basin took place in 1872 by Captain Pardon Dodds. He was followed by other cattlemen who had the surrounding ranges fully stocked within the next two years.

The first Anglo settlement on the Uinta Basin took place in 1872 by Captain Pardon Dodds. He was followed by other cattlemen who had the surrounding ranges fully stocked within the next two years.

In 1897, President Grover Cleveland set aside the Uinta Forest Reserve, which was expanded upon in 1908 by President Theodore Roosevelt. The federal government was not always popular in the area. The first Forest Supervisor, William Anderson, worked hard to develop good relationships with cattlemen and loggers, but there were still town meetings when he made sure his revolver was handy.

Today, the forest and range lands of the Ashley National Forest are protected and managed for all Americans, and for multiple benefits. The vast Uinta Mountains watershed provides vital water supplies for power, industry, farm, and city use in Utah, Nevada, Wyoming, and California. Sheep, cattle, and horses graze under permit on over a half million acres of the forest each season. Timber is managed to ensure a sustainable supply and a quality environment. Over one million visitors come to the forest each year to boat, fish, camp, hike, backpack, ride horses, cross-country ski, and snowmobile.

Swett Ranch

Swett Ranch Sitting on the benches of the Uinta Mountains near Red Canyon, Swett Ranch is a capsule of frontier life projected into modern times. Oscar Swett homesteaded the family’s original claim in 1909 accumulating additional acreage over the next 58 years. Today, Swett Ranch is on the National Register of Historic Places. Tours of the ranch are offered in the summer.

For over a decade, the Forest Service has been restoring Swett Ranch with the help of Passport in Time (PIT) volunteers. To volunteer for this or other PIT projects visit www.passportintime.com.

Ute Mountain Lookout

Ute Mountain Lookout was the first and is the last standing fire tower built in Utah. With a panoramic view of the Ashley National Forest and surrounding area, an observer has a 360-degree view of the northeastern slope of the Uinta Mountain Range. Still used as a fire lookout tower today, it is a monument to Forest Service cultural heritage—the early years of fire prevention and detection. Visit the tower in the summer and see what life is like for fire lookouts. Enjoy views of the High Uintas, Flaming Gorge, the historic Carter Military Highway and on a clear day, both Wyoming and Colorado.
High Uintas Wilderness

Within the 456,705 acres of the High Uintas Wilderness, cold, clear rivers plunge into deep canyons that form the headwaters of Utah's major rivers. Park-like meadows, lush wetlands, and alpine lakes edged by dense conifer forests are common. Above the treeline, rock outcrops or rounded 'bollies,' sparsely covered with tundra plant communities, rise to meet the skyline. Elk, mule deer, moose, mountain goat, black bear, bighorn sheep, ptarmigan, river otter, pine marten, and cougar frequent the Wilderness.

The High Uintas Wilderness was designated by Congress in 1984 as a place where its primeval character is protected. It is managed to preserve its 'wildness' while providing visitors with opportunities for solitude or primitive recreation.

Wilderness Trail Highlights

Highline Trail is over 90 miles long, but can be enjoyed in shorter segments via numerous connector trails. Chepeta Trailhead, located off Forest Road 110, provides access about 7 miles east of the High Uintas Wilderness. To the west, the trail ends at Mirror Lake on the Uinta-Wasatch-Cache National Forest.

Hades/Rocky Sea Pass Trail begins at Grandview Trailhead and ends at the boundary with the Uinta-Wasatch-Cache National Forest, 10.5 miles later. An abundance of lakes makes this a very popular trail.

Uinta Canyon Trail ends at the Highline Trail approximately 14 miles from the trailhead. This trail parallels the Uinta River Gorge for 11 miles after which it connects to the Highline Trail, an access route to King's Peak. Other destinations include Atwood Basin and Painter Basin.

Swift Creek Trail travels for 7.8 miles before ending at the junction with the Jackson Park Trail. Other destinations include Upper Yellowstone and Garfield Basin which is a popular access route to King's Peak.

Center Park Trail enters Garfield Basin and ends at Tungsten Pass on the Highline Trail, approximately 17 miles. It is known for its panoramic view of the entire Yellowstone Basin at Swasey's Hole.

Highlights

* King's Peak: the tallest in Utah at 13,820'
* Numerous mountain lakes with outstanding fishing
* 6 major trailheads in the Ashley National Forest
* 545 miles of trail

Know Before You Go

People visit wilderness in search of a special experience defined by its wild character. Expect to encounter the challenges and risks of changing weather, rugged terrain, and other natural hazards. Travel with a good map and know how to use it. Use extreme caution when crossing rivers and snowfields—this is where most wilderness accidents occur. Water sources in the High Uintas Wilderness are plentiful but unsafe to drink without treatment, due to giardia, cryptosporidium, and other waterborne microbes.

Remember YOU are responsible for your safety.

To protect natural resources and the wilderness experience, the following are prohibited within the High Uintas Wilderness:

- Use of any motorized or mechanized forms of machinery.
- Groups exceeding 14 persons and 15 head of stock. Groups exceeding this size must divide into separate parties and remain at least one mile apart.
- Camping within 200 feet of any occupied campsite, designated trail, or water source.
- Failing to properly dispose of all garbage (pack it out) and leaving human waste in an exposed or unsanitary manner.
- Building a campfire or using a wood stove within 1/4 mile of a location closed to these activities (see trailhead bulletin board).
- Restraining a saddle or pack animal for longer than one hour within 200 feet of a water source or tying an animal directly to a tree for more than one hour. Animals must be moved sooner if damage to the tree, soil, or vegetation is occurring.
- Shortcutting a switchback in a trail.
- Damaging any natural feature. This includes, but is not limited to: failing, or damaging trees, trenching, and vandalism.
- Constructing any structure or improvement. This includes, but is not limited to: hitchrails, furniture, shelters, and rafts.

Visit the High Uintas Wilderness website page for maps and a list of authorized outfitters and guides who can help you with your adventure: www.fs.fed.us/r4/ashley/recreation
**Flaming Gorge-Uintas National Scenic Byway**

Are you ready for adventure? A road trip along the Flaming Gorge-Uintas National Scenic Byway may be just the ticket.

The byway meanders over the eastern flank of the Uinta Mountains—one of the few east-west ranges in the country—and through the Flaming Gorge National Recreation Area. The majestic peaks of the Uinta Mountains provide the backdrop.

Aptly named, the theme for the byway is “Wildlife through the Ages” since the route travels through one of the richest areas for wildlife and fossils in the west. During your drive you will not only experience abundant wildlife, but also deep multi-colored canyons, unique geologic features, breathtaking scenic vistas, and broad forest landscapes. Many wayside exhibits and trails are available to enhance your visit. The route also crosses Flaming Gorge Dam, towering 502 feet above the waters of the Green River below.

**Length:** 45 miles/72 km  
**Time to Allow:** 2.5 hours  
**Note:** The road surface varies between paved and gravel, and some portions are closed in winter months.

---

**Red Cloud Loop Scenic Backway**

The Red Cloud Loop makes a circle starting on US 191, north of Vernal Utah. The route crosses through broad meadows, aspen groves, and through a sea of lodgepole pine forests. You’ll also catch glimpses of the High Uintas Wilderness and broad vistas across the Uinta Mountains.

**Length:** 45 miles/72 km  
**Time to Allow:** 2.5 hours  
**Note:** The road surface varies between paved and gravel, and some portions are closed in winter months.

**Sheep Creek/Spirit Lake Scenic Backway**

The Sheep Creek part of this backway circles off of Utah State Highway 44 through the varied and dramatic geologic formations of the Sheep Creek National Geologic Area. This relatively small area is occupied by an impressive variety of birds and other wildlife. Unique formations, wildlife, and vegetative variety give the area some of the most impressive close-up scenery on the Ashley National Forest.

**Length:** 48 miles/76.8 km  
**Time to Allow:** 45 minutes to 4 hours  
**Note:** The road surface varies between paved and gravel, and is closed in the winter.

Spirit Lake Scenic Backway road is a 17-mile spur off of the Sheep Creek Loop, and winds through meadows and forests to the alpine area around Spirit Lake, just below the High Uintas Wilderness.
Indian Canyon Scenic Byway

This Byway begins near Duchesne on US Highway 191 (a part of Dinosaur Diamond Scenic Byway) and crosses the colorful terrain between the Uinta Basin and San Rafael Swell near Price. Varied landscapes of steep and colorful rock formations provide a visual treat. Stretching southwest on US Highway 191 from Duchesne, the byway follows Indian Creek through desert terrain before climbing to the summit at 9100 feet. On the way you pass through pinyon and juniper to aspen and Douglas fir. Descending the south flank, you pass open vistas and the beginning of the Roan and Book Cliff formations. The byway ends in the historic mining town of Helper.

Reservation Ridge Scenic Backway

Reservation Ridge Scenic Backway starts on Highway 6.31 miles north of Price at Soldier Summit. It then loops south to join US 191 north of Price.

This backway begins with dramatic views of Strawberry Reservoir to the north. The route roughly parallels the Right Fork of the White River at first, as it climbs up to 8900 feet. It then curves south through aspen and pine stands perched on top of the plateau, and openings provide more views of rugged cliffs and steep canyons.

Rock Creek Canyon

Rock Creek Canyon is one of several scenic canyons along the south face of the Uinta Mountains. There is a wide variety of recreation activities available here, including river fishing, group and single-site campgrounds, and trails to the High Uintas Wilderness. The paved road to Upper Stillwater Dam—considered the largest roller compacted concrete dam in the world—follows Rock Creek. Don’t miss the visitor center below the Upper Stillwater Dam.

Winter Recreation

Groomed and ungroomed snowmobile trails, and seemingly endless backcountry provide opportunities to winter recreation enthusiasts. Several cross-country ski trails are available from Highway 191 and from Highway 44 along the southern and western rim of the Flaming Gorge Reservoir.

If ice fishing is your sport, the Flaming Gorge Reservoir is a favored and productive winter fishery. Anglers should check with local offices or businesses for ice conditions as warm weather and fluctuating water levels may cause hazardous ice.

Yurts and cabins can be rented in winter (see page 11 for more information). For more details on winter activities, visit http://www.dinoland.com/userfiles/file/winterguide.pdf.
As one of the most aptly named landscapes in the country, the vast scenery of Flaming Gorge may not fit into your camera.

The Flaming Gorge National Recreation Area (NRA) is centered along the 91-mile section of the Flaming Gorge Reservoir and a rugged section of the Green River. The mix of climate and topography provide year-round recreation. The southern part includes colorful, narrow canyons, and conifer forests; the northern part is surrounded by high sagebrush deserts and rock mesas. Campgrounds, lodges, marinas, boat launches, swimming beaches, fishing areas, and hiking/ski trails are available along the 360 miles of shoreline and tucked into mountain retreats. Close at hand are the quaint communities of Manila, Green River, and Dutch John, which have accommodations and other services.

Flaming Gorge Dam Visitor Center
- Open during the summer
- Exhibits share the history and operations of the water facilities
- Guided tours of the Dam are given throughout the summer. Call for a schedule (435-889-3133)

Red Canyon
Perched high above the reservoir at the southern end of Flaming Gorge NRA lies the Red Canyon Recreation Complex. A destination unto itself for many visitors, the area includes the Red Canyon Overlook and Red Canyon Visitor Center. These sites offer commanding views of the 700' wide and 1,400' deep Red Canyon that frames the Flaming Gorge Reservoir.

Green River
On the Green River, fly fishing from the shore or rafting through rugged canyons below the Flaming Gorge Dam on the Green River are treasured adventures for many visitors to the Flaming Gorge NRA. Two main launch areas, several backcountry campgrounds, a shoreline trail, and year-round fly fishing await you. Guided trips are available.

Sheep Creek National Geologic Area
More than a billion years of geologic history are showcased within this nationally significant geological area. Here, ancient formations overlain by layers of younger rock were flexed upward with the rise of the Uinta Mountains about 70 to 40 million years ago. Nine formations that comprise about 8,000 feet of rock are exposed in bands that dip northeastward with the oldest in the south and the younger to the north. Sheep Creek lies southwest of Manila.
Flaming Gorge NRA passes are required at the following areas:

Activities

Fishing

Whether fly fishing in the Duchesne or Green River, or jigging on Flaming Gorge Reservoir, the Ashley National Forest is an angler’s paradise.

Flaming Gorge Reservoir is a premier fishing destination and is nationally renowned for its trophy lake trout. Other species include kokanee salmon, rainbow trout, brown trout, small mouth bass, channel catfish, and burbot.

The Green River below Flaming Gorge Dam is considered one of the best tailwater fisheries in North America. Seven miles of river support an estimated population of 15,000 fish/mile (rainbow, brown, and cutthroat trout). Be sure to check the current Utah Fishing Proclamation prior to your trip for special regulations pertaining to the Green River.

Green River Fishing Access and Facilities

- Flaming Gorge Dam Spillway: Located approximately one mile below the dam. Facilities include a boat ramp, restrooms, and a trailhead. Drinking water is available seasonally.
- Little Hole: Located approximately 7 river miles below the dam. Facilities include boat ramps, fully accessible parking, fishing platforms, restrooms, picnic areas, and the Little Hole Trailhead. Drinking water is available seasonally.
- River Camping: There are 17 float-in campsites located below Little Hole and some may be accessible on foot. Reservations are available for 6 of these sites; fees are charged for all. Non-reserved sites are first come-first served, but registration for campsites must be made the day of use at Little Hole on the camp registration board.

For those looking for a remarkable backcountry fishing experience, the High Uintas Wilderness is the place to find it. Popular areas include Grandaddy Basin, Brown Duck Basin, Garfield Basin, and Swift Creek Drainage. These are excellent destinations for mid to late summer trout fishing.

Along the south face of the Uintas, several fishing sites can be accessed by road. Popular locations include the North Fork Duchesne River, Rock Creek, Lower Stillwater Ponds, Moon Lake, Yellowstone River, Uinta River, Pole Creek Lake, and the Rock Lakes. Anglers can expect to catch several species of trout in these waters including brown trout, brook trout, rainbow trout, and Colorado River cutthroat trout. Moon Lake also contains splake, tiger trout, and kokanee salmon.

For more fishing information
Utah or Wyoming State fishing license required. A reciprocal stamp is available if fishing in both states. Visit the Utah Division of Wildlife Resources (http://wildlife.utah.gov/fishing/) or the Wyoming Game and Fish Department (https://wgfd.wyo.gov/fishing-and-boating).
Boating

Boating on Flaming Gorge Reservoir could be the highlight of your visit. The Utah portion is set in spectacular mountain scenery, with dramatic cliffs and narrow canyons. The Wyoming section spreads out into wide, high desert plains. Summer water temperatures are cool, providing excellent fishing and water sports.

Boaters should note: reefs and rocks are not marked. Due to fluctuating lake levels, boaters must use lake maps and familiarize themselves with locations of hazards. Winds can arise suddenly.

SAFETY EQUIPMENT IS REQUIRED BY STATE LAW
Familiarize yourself with Utah and Wyoming state boating regulations at:
http://stateparks.utah.gov/stateparks/boating
https://wgfd.wyo.gov/fishing-and-boating

Marinas

There are three marinas located around Flaming Gorge NRA that offer mooring, storage, fuel, minor repairs, limited rentals, and general supplies. All are able to accommodate large boats.

Buckboard Marina: 25 miles south of Green River, WY off Highway 530; (307) 875-6927
Lucerne Marina: 7 miles east of Manila, UT, 42 miles south of Green River, WY, off Highway 530; (435) 784-3483 or (888) 820-9225
Cedar Springs Marina: 2 miles west of Flaming Gorge Dam; (435) 889-3795

Boat Ramps

In addition to the marinas listed, the Forest Service maintains the following paved ramps (FCS-fish cleaning station):
- Cedar Springs - FCS
- Antelope Flats - FCS
- Anvil Draw
- Holmes Crossing
- Buckboard Crossing - FCS
- Lucerne - FCS
- Sheep Creek
- Firehole Canyon - FCS
- Mustang Ridge

Aquatic Nuisance Species

When zebra and/or quagga mussels invade our local waters they damage boats, destroy fish habitat, and clog public water pipes.

Once a boat has been in infested waters, it could carry invasive mussels. Zebra and quagga mussels attach to boats and aquatic plants carried by boats. These mussels also commonly attach to bait buckets and other aquatic equipment. You can help stop these aquatic hitchhikers by following these three steps:

1. Clean mud, plants, animals or other debris from your boat and equipment
2. Drain the ballast tanks, bilge, livewells, and motor
3. Dry (7 days summer; 18 days spring/fall; and 30 days winter) or freeze (3 days)

If you cannot perform these steps, you should have your boat professionally cleaned (available free of charge from Utah Division of Wildlife Resources).

Watchable Wildlife

Watching the bountiful wildlife on the Ashley National Forest is a favorite activity. The slopes and peaks of the Uintas are home to elk, deer, moose, Rocky Mountain bighorn sheep, and black bear. A resident herd of bighorn sheep are easily viewed year-round close to the Red Canyon Visitor Center and Sheep Creek.

The Henry’s Fork Wetlands and the Red Canyon recreation area are popular birding sites. Osprey, turkey vultures, and golden eagles are commonly seen soaring along the canyon walls. Or you might spot a Merriam turkey on the floor of Red Canyon.

Every year, wintering bald eagles, hawks, and thousands of migrating songbirds, ducks, geese, sandhill cranes, and other waterbirds congregate along the wetlands of the Green and Duchesne Rivers. Waterfowl are plentiful at the Lower Stillwater ponds on the Duchesne/Roosevelt Ranger District.

The shores of Flaming Gorge Reservoir host a large nesting colony of ospreys. One of the higher concentrations is in the Dutch John Bay area where several nests can be seen. Blue, ruffed and sage grouse also make their homes on the slopes of the mountains; the best viewing is in the spring and summer months.

Three species of falcon—peregrine, prairie falcons, and American kestrel—nest along the cliffs and in the trees around the reservoir, along with golden eagles, turkey vultures, and red-tailed hawks. Bald eagles can also be found here, most often in the late fall when they feed on fish, ducks, rabbits, and prairie dogs.

Kokanee salmon run in Sheep Creek during September and October. Try a float trip down the Green River for more fish spotting, or even better, try snorkeling for a close-up look.

Activities

Trails

There are 1,023 miles of trail on the Ashley National Forest that offer a variety of opportunities, everything from motorized frontcountry trails to non-motorized Wilderness trails. A few highlights are shown below:

Day Hikes

Canyon Rim Trail, on the Flaming Gorge NRA, begins at the Red Canyon Overlook and follows the canyon rim for approximately 1.5 miles, then continues on to the trail’s end at the Greendale Overlook. Spur trails provide access to lodges and campgrounds.

Little Hole Trail, on the Flaming Gorge NRA begins at the Flaming Gorge Dam spillway and ends at Little Hole Day Use Area. This trail follows the Green River corridor and is commonly used for fishing access. It holds the special designation of being a National Recreation Trail.

Dry Fork Flume Trail can be accessed at the forest boundary about 5 miles northwest of the Dry Fork settlement. The trail provides access to the historic flume structures, then climbs to the Horseshoe Park area where it ties into the Sink Ridge Trail. There are three different access points along the trail.

Rock Creek Trail provides access to the High Uintas Wilderness Area where it ties into the head of Rock Creek Trail. Follow the trail for about 3 miles while it skirts the west edge of Upper Stillwater Reservoir, then follows Rock Creek before entering the Wilderness. The elevation change between the trailhead and the Wilderness boundary is 100 feet.

ATV and Motorcycle Trails

Many roads and trails in the forest are open to off-highway vehicles (OHV). However, visitors should get a forest travel map from any Ashley National Forest office before venturing out.

The national forest has developed two motorized trail systems specifically to provide OHV opportunities. They are well-suited for a one-day ride. Some portions are very challenging and rocky, requiring above-average riding skills.

The Outlaw ATV Trail on the Vernal Ranger District consists of graded roads, 4x4 roads and ATV trails. There are several trailheads along the route, allowing riders access to sections appropriate to their skill level. An Outlaw ATV Trail brochure is available at Forest Service offices.

The Yellowstone ATV Trail on the Duchesne Ranger District provides two separate loops that consist of graded roads, 4x4 roads, and ATV trails. The difficulty levels range along the trail and may not be posted. More information is available at the Duchesne District office.

Unpaved and primitive roads present special challenges even in good weather. Before you head out, think about another challenge—your responsibility to “Tread Lightly.” Here’s how:

Travel only where motorized vehicles are permitted.

Respect the rights of others to enjoy their activities undisturbed.

Educate yourself by obtaining travel information and regulations from public agencies, and ask owners’ permission to cross private property.

Avoid water, meadows, muddy roads, steep hillsides, wildlife, and livestock.

Drive responsibly to protect the environment and preserve opportunities to enjoy your vehicle on wild lands.
OHV Etiquette

* Keep the RPMs and speed low and steady when you are near houses, campgrounds, people, or animals.
* Stay on designated roads and trails.
* Don’t keep food (or anything that smells) in tents.
* Don’t keep food and garbage in closed vehicles and out of sight.
* Never put food scraps in the campfire - it attracts bears and skunks.

For more information, visit www.BeBearAware.org.

Know Before You Go

Dispersed Camping

Camping is free in the remote areas of the forest and is an extremely popular way of "getting away from it all" in the summer and fall months. Several of the popular camping areas have minimal facilities (such as fire rings and restrooms) to protect the natural resources. Other areas are just a pull-off from the road. Some road corridors are closed to motorized off-road camping due to concerns about resource damage. Camping is limited to 16 days within an area; your camper may not be stored in the national forest. Please refer to the Motor Vehicle Use Map for details on where to camp.

Wash Away from Water

Soap degrades water quality and harms fish and other aquatic life. Wash at least 200 feet from the water.

Use Established Fire Rings Wisely

* Check at the local Ranger Station for current fire restrictions. Remember they can change on a daily basis.
* Use existing fire rings if possible.
* To put out a campfire slowly pour water onto the fire and stir with a shovel. Continue adding and stirring until all material is cool to touch.
* Do not simply bury your fire. The coals can smolder and re-ignite.
* NEVER leave a fire unattended, even if there are no flames present. Many wildfires have been caused by abandoned campfires.

Human Waste

Bacteria and viruses found in human feces are known to cause many different gastro-intestinal diseases. Please follow these simple steps when nature calls:

* Flaming Gorge NRA: All human waste must be deposited in a self-contained unit such as a portable toilet.
* RVs, Campers, and Boats across the Forest: It is illegal to dump waste water anywhere except at designated dump sites. Check with Forest Service offices or field personnel to see where these are provided.
* Backcountry Campers: You may dispose of waste by digging a hole at least 200 steps from any water source and burying the waste. Used toilet paper must be packed out.

Be Bear Aware!

If bears become accustomed to human food, they may become aggressive towards people or cause property damage. Eventually these bears may have to be destroyed.

* Keep a clean campsite. Store food and garbage in closed vehicles and out of sight.
* Never put food scraps in the campfire - it attracts bears and skunks.
* Store stoves in a secure place when not in use.
* Some bears also target motor oil, insect repellent, toothpaste, liquor and other things that look like food. Keep these items stored properly.

For more information, visit www.BeBearAware.org.
Recreation fees have made a positive difference in our ability to serve our visitors because these dollars can be reinvested into services and infrastructure on the Ashley National Forest. Highlights of our recent accomplishments include:

- **Cabin and Yurt Rentals** – Ongoing maintenance and major plumbing and building repairs were completed at Colton, Trout Creek, Paradise and Summit Springs Guard Stations and at Limber Flag, Grizzly Ridge, and Carter Military Yurts.
- **Boat Launches** – In combination with grant funding, a new vault toilet was installed at the Spillway Ramp parking lot and Lucerne boat ramp. Maintenance is performed on fish cleaners, rest rooms, floating pump out stations, and docks.
- **Water and Sewer Systems** – Major repairs have been completed at Buckboard, Cedar Springs, and Moon Lake campgrounds. Minor repairs and maintenance was performed on water systems across the forest. The water systems allow for flush toilets, dump stations, fish cleaning stations, and water at marinas, campgrounds, boat ramps, and lodges across the forest.
- **Visitor Services** – Red Canyon Visitor Center was remodeled to include new exhibits and a fresh new look for the 50th anniversary of the visitor center. Seasonal rangers, campground hosts, and visitor use assistants are funded to increase visitor safety protect resources, answer questions, and keep restrooms clean.
- **Campgrounds and Day Use Sites** – New fire rings and picnic tables were installed at campgrounds throughout the forest, along with other maintenance tasks. The Moon Lake Campground was completely redesigned and reconstructed. The Dam Point picnic area was constructed with a combination of grant funding and fee dollars.
- **Information Services** – The design and production of this Visitor Guide was funded by recreation fees.

**Volunteering**

The Forest Service Volunteer Program on the Ashley is very active. The jobs are exciting and diverse. Scenery is exceptional and co-workers are friendly. For more information, contact any Forest Service Office, or visit [www.volunteer.gov](http://www.volunteer.gov).
