Forest Road 958 in Cow Creek Buttes area permanently closed

(Douglas, Wyo.) – The Douglas Ranger District would like the public to be aware that the eastern portion of National Forest System Road 958 is permanently closed to all motorized vehicles, per decisions made in the 2009 Thunder Basin National Grassland Travel Management Plan.

It was determined that the road should be closed because it is in the non-motorized area designated in the 2003 Thunder Basin National Grassland Land and Resource Management Plan. These management decisions were made following extensive public involvement.

Road 958 has a closed gate about six miles east of the junction of NFSR 958 and 959. The closed section is north for about four miles to the junction with NFSR 962. The area is in the Cow Creek Buttes area, about 15 miles northeast of Bill, Wyo.

Please call the Douglas Ranger District for the most current information, 307-358-4690.
