

Wasatch-Cache Forest Plan

Amendment No. 2

Effective with the Decision on the Supplement to the EA for Snowqualmie Water Tank and Distribution Line, November 10, 2004

POSTING NOTICE:

Because this is a waiver there are no insert pages associated with this posting notice.

EXPLANATION:

The analysis to substantiate the waiver of Standard 3.1W is found in the Supplement to the EA for Snowqualmie Water Tank and Distribution Line, May 2004.

This amendment is a non-significant amendment to the Wasatch-Cache Forest Plan that allows a waiver to standard (S3.1W) in Management Prescription 3.1W as it is applied to the Snowqualmie Water Tank and Distribution Line special use authorization. In other areas of the Wasatch-Cache where Management Prescription 3.1W is applied road construction is not allowed. The amendment is provided to allow Layton City the authorization to construct, operate and maintain the water tank, the pipeline and service roads on National Forest System lands consistent with the Revised Forest Plan.
