

# Juniper Springs Run Ocala National Forest

## Trail Information

### Description

Juniper Springs Creek starts as a very narrow and shallow run that gradually widens. It travels through Juniper Springs Wilderness Area so there are no intermediate access points.

### Rating

The first portion of the Run can be difficult due to the narrowness of the channel. Eventually the creek widens and becomes very slow moving. Fallen trees across the narrow portion of the channel add to the difficulty.

### Distance

7 Miles
