

Need Help with Water and Wastewater Maintenance Inspections, Design, or Contract Preparation?

Enterprise Technical Services (ETS) Offers Quick, Easy and Cost Effective Services:

ETS is available to help any government agency on a non competitive basis through the Forest Service Enterprise Program. This eliminates potentially long contracting processes to get you help quickly.

Debbie Olsen is ready to meet all your water and waste water needs. Her experience includes designs, contract preparation, condition surveys and O&M inspections. Debbie is available at lower rates than most A&E firms or IDIQ contracts.

Water and Wastewater Services:

Design and Contract Preparation: Prepare designs and contract packages for water and wastewater projects.

Annual Operation and Maintenance Inspections: Condition Surveys and annual O&M inspections for your water and wastewater systems.

Operation and Maintenance Plans: Development of operation and maintenance plans of Forest Service water and/or wastewater systems.

Basic Environmental Compliance: Help clients meet the laws, regulations and other requirements pertaining to their water and wastewater systems. ETS can provide innovative and effective solutions and services.

Staff: Debbie Olsen has eight years Forest Service experience, working 5 years as the facility engineer for the Flathead National Forest and 3 years as a civil engineer for the Kootenai National Forest. She spent 10 years working in the private sector and is a registered professional engineer in the state of Montana. She has experience working with the Montana and Wyoming DEQ offices, and has completed several water and wastewater designs, contract packages, O&M plans, and developed a utility feasibility study for the Forest Service West Yellowstone Interagency Fire Center.
