

**Not R2 SS, But Should Be Considered for other
Emphasis Species Lists**

Recommendations and Evaluations

Common Name: Henslow's Sparrow

Scientific Name: *Ammodramus henslowii*

Recommendation: **Not R2 SS, be should be considered for other Emphasis Species Lists**

Recommendation Rationale:

Henslow's Sparrow has not been confirmed nesting on FS lands in R2. Nationwide trend is significantly downward. Needs tallgrass, structure often lost under intensive grazing. But, lack of occurrence in R2 and lack of agency influence over habitat likely within nesting range of species, argues for not SS status but emphasis species if it is shown to occur on R2 unit.
