

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Arctic Peregrine Falcon

Scientific Name: *Falco peregrinus tundrius*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

The species is strictly a migrant through R2, where individuals may spend a short period of time on the migratory journey. Habitat use is broad. Consequently, there appears to be no practical or meaningful way in which NFS management actions influence or could influence species viability.
