

## Not R2 Sensitive Species and Not of Concern

### Recommendations and Evaluations

**Common Name:** Broad-winged Hawk

**Scientific Name:** *Buteo platypterus*

**Recommendation:** Not R2 Sensitive Species and Not of Concern

### Recommendation Rationale:

Species historically was only a transient in R2, but recent westward range expansion may increase occasional breeding within R2. Present status in Black Hills and northeast WY is unknown as range expansion continues. However, all evidence argues that sensitive status is not warranted at this time.
