

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Plumbeous Vireo

Scientific Name: *Vireo plumbeus*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

There is likely a stable population trend in R2 and it is common in appropriate habitat (pinyon-juniper and ponderosa pine forests) on many R2 NFS units. Range wide, the BBS shows a significant increase over time. Habitat trends in R2 do not indicate any significant threats to this species habitat in the near future, therefore SS designation is not warranted.
