

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Rose-breasted Grosbeak

Scientific Name: *Pheucticus ludovicianus*

Recommendation: Not R2 SS and not of concern

Recommendation Rationale:

R2 is on the extreme western periphery of Rose-breasted Grosbeak breeding distribution. This species is common in the core of its range, and BBS data suggest an overall stable population trend. Unlikely to regularly breed on NFS lands in R2. No indication of viability concern for this species.
