

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Virginia Rail

Scientific Name: *Rallus limicola*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

It is thought to be common throughout its range (although secretive). Despite the fact that no valid population trend data exists for R2, populations are thought to be stable. Habitat trend appears to be stable on NFS lands. Some threats from grazing but habitat is resilient.
