

## Not R2 Sensitive Species and Not of Concern

### Recommendations and Evaluations

**Common Name:** Whip-poor-will

**Scientific Name:** *Caprimulgus vociferus*

**Recommendation:** Not R2 Sensitive Species and Not of Concern

### Recommendation Rationale:

This species is not likely to breed and is only rarely observed on NFS lands in R2. It is declining in eastern deciduous forests, but fairly common in other places. There is no trend data available for R2 because it is not known to breed in R2. In addition, habitat in R2 is likely stable with few threats on NFS lands.
