

## Dubois Bunkhouse and Warehouses

### Shoshone NF

This project included a 2,300 sq. ft. R2 standard Modular 10-person crew quarters, a 5,400 sq. ft. warehouse storage facility, and the restoration of a 1932 historic warehouse.

The storage facility includes an engine storage/shop, fire cache, break room, restrooms with showers, and warehouse storage. The building was designed to meet or exceed the requirements of the Climate Zone for its location as per the International Energy Conservation Code. The building walls are constructed of 6.5" Structural Insulated Panels (SIP). A 2 kw photovoltaic system was installed on the roof.

Restoration of the 1932 warehouse included vertical realignment, slab-on-grade and foundation repairs, plywood diaphragm loft flooring and installation of tension tie rods, exterior repairs, electrical improvements, window repair/replacement, staircase enclosure, and more.
