

Ruth Mill Garden

A Partnership Project with the Columbine Garden Club, Clear Creek Metropolitan Recreation District, and the Arapaho and Roosevelt NF.

This park in Idaho Springs, CO was originally a gold mill in the late 1800s. Designed to reflect this historical significance, features include an interpretive plaza and arbor promenade, rustic timber playground, and xeriscape, rose, and alpine garden areas. CDI provided design services and construction consultation for the community that built the park.
