

Meadow Creek Watershed Analysis

Table of Contents

Meadow Creek Watershed Analysis Table of Contents

<u>TITLE</u>	<u>PAGE</u>
INTRODUCTION	
A. Context	1
Pacfish	
SAT and FEMAT	
Eastside Forest Health Assessment	
Interior Columbia Basin Ecosystem Management Project	
Roads Analysis	
B. Intent	3
Purpose of Watershed Analysis	
Forest Plan Connection	
Project Level Planning	
C. Connection with Other Scales	4
Hierarchical Scale	
D. Methodologies	5
E. Public and Interagency Involvement	5
F. Organization for Conducting Watershed Analysis	5
G. Report Organization	5
H. Summary	6
 CHAPTER ONE – Description of Watershed	
A. Location	1
Regional and Landscape Analysis	
Watershed Level Analysis	
B. Climate	5
C. Geology	6
D. Topography	6
E. Terrestrial Environment	6
F. Aquatic Environment	7
G. People	7
H. Human Uses	7
I. Values	9
 CHAPTER TWO – Issues and Key Questions	
A. Purpose	1
B. Issues and Key Questions	1
The Physical Dimension	2
Aquatic	2
Roads Analysis	2
Aquatic	
Hydrologic	
Soils	2
The Human Dimension	3
Roads Analysis – Human Dimension	3
Resource Mgmt and Admin Use	

<u>TITLE</u>	<u>PAGE</u>
Other Ownership Access	
Safety	
Fire Suppression	
Heritage	
Recreation	
Roads Analysis – Economics	3
The Biological Dimension	4
Old Growth and Structural Diversity	4
Elk and Deer Habitat Effectiveness	
Roads Analysis	4
Wildlife	
Aquatics	
Riparian	
Threatened, Endangered, and Sensitive Species	4
Fire and Fuels	5
Noxious Weeds	5
Range	5
Insect and Disease	5
 CHAPTER THREE – Existing Condition	
The Physical Dimension	1
Aquatic	1
Natural Features	19
Soils	22
The Human Dimension	27
Social Assessment	27
Transportation System	31
Recreation	40
Administrative Sites/Facilities	41
The Biological Dimension	41
Old Growth and Structural Diversity	41
Elk and Deer Habitat Effectiveness	49
Threatened, Endangered, and Sensitive Terrestrial Vertebrate Species	51
Fisheries	57
Plant Species of Concern	73
Special Forest Products	81
Research Natural Areas	81
Fire and Fuels Management	82
Noxious Weeds/Invasive Species	99
Non-Forest Vegetation	106
Grazing/Range Management	107
Insect and Disease	118
 CHAPTER FOUR – Desired Condition Measures and Trends	
A. Forest Plan Management Areas	1
B. Desired Condition Measures and Trends	3

<u>TITLE</u>	<u>PAGE</u>
The Physical Dimension	3
Aquatics	3
Roads Analysis	5
Water Quality	
Water Quantity	
Hydrologic	
Soils	6
The Human Dimension	6
Roads Analysis – Human Dimension	6
Resource Mgmt and Admin Use	
Other Ownership Access	
Safety	
Fire Suppression	
Heritage	
Recreation	
Roads Analysis – Economics	8
The Biological Dimension	8
Old Growth and Structural Diversity	8
Elk Habitat Effectiveness	11
Roads Analysis	12
Aquatics	
Riparian	12
Threatened, Endangered, and Sensitive Species	13
Fire and Fuels	13
Noxious Weeds	15
Range	16
Insect and Disease	18
 CHAPTER FIVE – Opportunities	
A. Forest Wraps Process	1
B. Recommendations	2
C. General: Survey and Monitoring	3
D. Physical Dimension	4
a. Aquatic	4
E. Human Dimension	7
a. Recreation	7
b. Roads Analysis	8
F. Biological Dimension	14
a. Diversity, Old Growth, Insects & Disease	14
b. Fire & Fuels	17
c. Range & Noxious Weeds	19
 CHAPTER SIX – Monitoring	
A. Introduction	1
B. Forest Land and Management Plan Monitoring	1
C. Coordinated Monitoring for Ecosystem Sustainability	4
D. Watershed Scale Monitoring	7
E. Screening of Recommendations	9
F. Fire/Fuels Monitoring	13

<u>TITLE</u>	<u>PAGE</u>
G. Silviculture Monitoring	17
H. Fisheries and Watershed Monitoring	17

CHAPTER SEVEN – Threshold Analysis

A. Aquatics	1
B. Roads	1
C. Soils	1
D. Roads – Human	2
E. Old Growth	2
F. Structural Diversity	3
G. Wildlife Habitat Effectiveness	3
H. Riparian Condition	4
I. Fire and Fuels	4
J. Other Resources	5
