

National Forests in Alabama
Revised Land and Resource Management Plan
Amendment #2 – Minerals Operations Standard
December 27, 2010

Chapter 2 Forest Wide Direction

Page 2-65 Description: Add the following standard to provide for the protection of steep slopes during minerals leasing operations, to the *Federal Leasable Mineral General* section, following FW-162.

FW 185 – *Surface occupancy during minerals leasing operations is limited to slopes ≤ 40 percent.*

This amendment is a non-significant change to the NFsAL Revised Land and Resource Management Plan. The determination that this is a non-significant amendment is made in accordance with 16 U.S.C. 1604(f)(4), 36 CFR 219.10(f) (1982 regulations), Forest Service Manual 1926.51 – Changes to the Land Management Plan that are Not Significant and FSM 1926.52 – Changes to the Land Management Plan that are Significant . This plan amendment meets the criteria for a non-significant amendment because:

- This amendment will not significantly alter the levels of goods and services projected by the Forest Plan; nor will it prevent the opportunity to achieve those outputs in later years.
- This amendment will not affect the entire land management plan, nor will it affect a large portion of the planning area during the planning period.

The National Environmental Policy Act analysis for this change of direction has been documented in the Environmental Assessment for Forest Plan Amendment (Minerals Operations Standards). The Environmental Assessment is available for review at the Forest Supervisor's office.
