

**ASHLEY NATIONAL FOREST
Duchesne Ranger District
Rock Creek Cattle Allotment
2010 Annual Operating Instructions**

<u>Permittee</u>	<u>Number</u>	<u>Season</u>
Ron Miles	90	June 11 to October 15
Shane Gardner	<u>80</u>	June 11 to October 15
Total Herd Size	170	

Grazing Schedule

Unit	Sequence	Dates of Use	Allowable Use
Lower Canyon	1 st	6/11 – 7/21	50%
Wilderness	2 nd	7/22 – 8/30	50%
South Fork	2 nd	7/22 – 8/30	50%
Miners Gulch	3 rd	9/1 – 10/15	50%
Yellow Pine	3 rd	9/1 – 10/15	50%

The dates of use above are to be used as guidelines. The primary determining factor for moving livestock from one unit to the other is utilization. As stated above, allowable use is 50% in upland forage areas in all units. A 4” to 6” stubble height of riparian forage species (i.e. sedges) shall be left in all riparian forage areas (i.e. stream corridors and wet meadows). A 40% allowable use and a 6” stubble height for riparian species are standard guidelines for grazing units inside the High Uintas Wilderness Area. Permittees should closely monitor key areas. It is imperative that permittees do not allow cattle to graze to a point that the key areas have a “mowed” look to them (i.e. all grass seed heads and stalks have been removed from the plants), which indicates about 60% use or greater. When allowable use in the key areas is met in each unit, the cattle need to be moved to the next unit.

A range technician will regularly visit the allotment throughout the summer to monitor permit compliance, forage utilization, and range improvements. Compliance of allowable use standards will be fully enforced. If compliance is not met, permittees will be sent notices of non-compliance and associated requirements to address the violation(s).

Grazing fees will be \$1.35 per head month this year. Fees must be paid through Lockbox collection procedures before livestock will be authorized to enter the National Forest.

Maintenance of Improvements

All fences and water developments must be maintained before the cattle will be allowed to enter the allotment. Please contact our office when you have completed your maintenance. Do so at least **five** days before the cattle enter the allotment to allow us sufficient time to inspect these improvements. A Range technician may randomly inspect the improvements at any time.

Improvement Maintenance Responsibilities

Improvement Number	Improvement Name	Improvement Number	Improvement Name
004250	Rock Creek Boundary Fence	004264	Rock Creek Corral
004254	Rock Creek Drift Fence	004359	Net Wire Division Fence
004507	Rock Creek Interior Fences	004508	South Fork Unit Fence
004265	Upper Stillwater Drift Fence	435572	Miners Gulch Spring
	Lake Basin Boundary Fence		

Annual Operating Plan Meeting

The annual operating meeting was held on March 31, 2010 in Roosevelt, Utah. Those in attendance were Ron Miles, Wes Gardner, Shane Gardner and Amber Helmus. The following items were discussed:

1. Permittees plan to construct a corral near the McAfee Basin and Rock Creek boundary. Contact Amber for materials.
2. Permittees mentioned that fences around the campgrounds are still in need of repair. Amber has already talked with Kim Bartel about this issue. The Recreation program plans to pipe all the campgrounds but may have to put up temporary fences until then.
3. Do not place salt in areas such as near campgrounds, stream or river corridors, wet or riparian areas, and adjacent to the Resource Natural Area in the South Fork of Rock Creek.
4. The cattleguard on the Miners Gulch road needs to be cleaned and water needs to be diverted away from the cattleguard. Amber will notify the FS road crew.
5. Permittees plan to fix the fence by White's cabin because cattle are jumping the fence. Contact Amber for materials.
6. Amber mentioned that a few of Ron's cows are grazing in the wilderness above the Rock Creek boundary. Ron and the Forest Service plan to identify the cows that are going beyond the boundary this summer. The cows that are grazing beyond the boundary will be removed and will not graze the allotment in the future. If this plan does not work, then a small drift fence may have to be constructed to prevent cattle from grazing beyond the boundary.
7. Shane mentioned that cattle are entering the Rock Creek Ranch horse pasture because the fence is not maintained. Rock Creek Ranch is responsible for maintaining the fence. Amber will notify Kim Bartel, Recreation Specialist, about this problem.

Noxious Weed Control

A concentrated effort is being made to control musk thistle, Russian knapweed, tall and regular whitetop, and other noxious weeds throughout the Roosevelt-Duchesne Ranger Districts and Duchesne County. Musk Thistle has been in the Miners Gulch area; along the main road through the canyon; throughout the Lower Stillwater Ponds area; along Yellowpine trail; and near Miners Gulch, Yellowpine, and Fishermans Parking campgrounds. Your help is needed in finding and reporting all weed infestations. If you find weeds, please take contact Amber Helmus.

Actual Use Record

The **actual use record and maintenance report** included with these operating instructions **needs to be filled out and returned immediately following the grazing season**. Permittees need to turn in separate actual use reports. If anything comes up concerning the allotment or your permit, contact Amber Helmus at (435) 781-5205 or cell (435) 790-7058. Thanks for your cooperation and have a good summer.

Amber Helmus
Rangeland Management Specialist
