Sensitive Species Recommendation (Please check 1 box below)						
<input checked="" type="checkbox"/>	R2 Sensitive Species (SS)	Not R2 SS, but should be considered for other Emphasis Species Lists				
<input type="checkbox"/>	Not R2 SS and Not of Concern Now	Insufficient Information Available to make a recommendation				
Recommendation Rationale						
<p>-Regional endemic from northeastern WY, western SD, northwestern NE, and southeastern MT</p> <p>-Reasonable numbers of occurrences however low reproductive rate and potential for habitat threats with coal-bed methane, oil and gas development merit attention for monitoring/managing.</p> <p>Conclusion: This species warrants sensitive status given limited habitat availability and potential threats from management activities related to oil and gas development.</p>
