Sensitive Species Recommendation (Please check 1 box below)					
<input checked="" type="checkbox"/>	R2 Sensitive Species (SS)	Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/>	Not R2 SS and Not of Concern Now	Insufficient Information Available to make a recommendation			
Recommendation Rationale					
<p>-Regional endemic of the northern Great Plains in western ND, western SD, and se MT</p> <p>-Species is not abundant and there is not easy dispersal between potential habitat locations</p> <p>-As an annual, ground disturbance could wipe out seed bank, although habitat threats are not described as extremely high</p> <p>-Additional survey is needed even though several species-specific surveys have been done</p> <p>Conclusion: this species warrants sensitive species status</p>
