| Sensitive Species Recommendation (Please check 1 box below) | | | | | | |
| | | | | | | |
| <input checked="" type="checkbox"/> | R2 Sensitive Species (SS) | | Not R2 SS, but should be considered for other Emphasis Species Lists | | | |
| | | | | | | |
| | Not R2 SS and Not of Concern Now | | Insufficient Information Available to make a recommendation | | | |
| | | | | | | |
| Recommendation Rationale | | | | | | |
| <p>Endemic in a limited geographic area in southwest Colorado. It occurs on the San Juan NF and adjacent private lands. The species appears to be restricted to disturbed, early seral vegetation on Mancos shale. A decline in habitat quality and quantity is occurring and expected to increase due to recreational impacts, road improvements, invasive species encroachment, weed control, residential development, and oil and gas development. There is a viability concern for this species and it warrants sensitive species status.</p> | | | | | | |
