Sensitive Species Recommendation (Please check 1 box below)						
<input checked="" type="checkbox"/>	R2 Sensitive Species (SS)		Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/>	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation			
Recommendation Rationale						
<p>This plant is an extremely narrow endemic, occurring only on Pikes Peak in Colorado. Only four occurrences are known; all are wholly or party on NFS lands. Adverse impacts to populations and habitat have occurred in the past from developed and dispersed recreational use and construction/operation/maintenance of the Pikes Peak Highway. Levels of use at this extremely popular recreation destination are anticipated to increase over time, and alpine habitats are slow to recover.</p>
