Sensitive Species Recommendation (Please check 1 box below)					
<input checked="" type="checkbox"/>	R2 Sensitive Species (SS)		Not R2 SS, but should be considered for other Emphasis Species Lists		
<input type="checkbox"/>	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>This plant is a narrow endemic of the Absaroka Range. It is known from 21 occurrences in WY, almost all on the Shoshone NF. Populations are typically very small. It is found on open, sparsely vegetated montane forests, meadows, and ridges, often on sandy volcanic soil or talus. Habitat is patchy is discontinuous on the landscape. Population and habitat trends are not known, but threats may include changes in hydrology, competition from exotics, trampling, etc. The Shoshone NF requested that it be designated as sensitive.</p>					

Name/Title	Nancy Warren	Date	March 17, 2003
