<b>Sensitive Species Recommendation</b> <span style="float: right;">(Please check 1 box below)</span>					
<input type="checkbox"/>	<b>R2 Sensitive Species (SS)</b>	<input checked="" type="checkbox"/>	<b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>		
<input type="checkbox"/>	<b>Not R2 SS and Not of Concern Now</b>		<b>Insufficient Information Available to make a recommendation</b>		
<b>Recommendation Rationale</b>					

**-Most populations in BHNF are in Black Elk Wilderness area and fairly well protected by management prescription**

**-Widely distributed outside R2, although disjunct in specialized habitat**

**- Big question not answered in evaluation is what is species distribution and abundance in CO**

**We decided this species doesn't warrant R2 sensitive species status, however, R2 units may want to consider this species for other emphasis species lists (this species may indicate healthy cold-air drainage habitat).**
