Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)	<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/>	Not R2 SS and Not of Concern Now		<input type="checkbox"/> Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>-Widely distributed –throughout SD into KS, NE, in WY just BHNF; an eastern deciduous forest species</p> <p>-Good dispersal characteristics; seems to persist with disturbance; wide ecological amplitude</p> <p>-BUT doesn't occur in high abundance anywhere</p> <p>Conclusion: this species doesn't warrant sensitive status but should be considered for other emphasis species lists – particularly more information gathered relative to abundance and distribution</p>
