

**Not R2 SS, But Should Be Considered for other
Emphasis Species Lists**

Recommendations and Evaluations

Common Name: Grand Junction milkvetch

Scientific Name: *Astragalus linifolius*

Recommendation: **Not R2 SS, be should be considered for other Emphasis Species Lists**

Recommendation Rationale:

--Local endemic only found in CO and mostly at lower elevations (~20 occurrences) and few records from GMUG. Also on Manti –La Sal NF in R4.

--Geographical distribution has been stable over past 75 years.

--Some potential threat from recreation, but no indication of serious risk to species viability at this time.

--Does not merit SS status but merits local concern due to limited occurrence on the GMUG.
