Sensitive Species Recommendation (Please check 1 box below)						
<input type="checkbox"/> R2 Sensitive Species (SS)		<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists				
<input type="checkbox"/> Not R2 SS and Not of Concern Now			<input type="checkbox"/> Insufficient Information Available to make a recommendation			
Recommendation Rationale						
<p>We recommend Emphasis Species status, especially in WY but not so much in CO, because of high number of populations in CO (28 populations & S3 rating) and inaccessible/rugged habitat (alpine fellfields, talus, scree, and cliffs) between 10400 – 12,500' in elevation) with few threats. Also known outside R2 in Wind River, Teton, and Gros Ventre ranges. 14 occurrences in WY with 6 of those on the Shoshone NF (these 6 populations may be locally abundant)..</p>						
<p>John Proctor and Gay Austin</p>
