Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)	<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/>	Not R2 SS and Not of Concern Now		<input type="checkbox"/> Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>Additional distribution data is needed to determine its status in R2. Recommend placing on Emphasis Species Lists for Medicine Bow National Forest. In Wyoming only known from the Medicine Bow Range and Sierra Madre Range of the Medicine Bow National Forest. It is an S4 for Colorado and is a regional endemic of the Front Range from southeast WY to northern NM Trends are probably stable at present. Threats are low due to this species rugged habitat.</p>
