

**Not R2 SS, But Should Be Considered for other
Emphasis Species Lists**

Recommendations and Evaluations

Common Name: saffron ragwort

Scientific Name: *Packera crocata* (*Senecio crocatus*)

Recommendation: **Not R2 SS, be should be considered for other Emphasis Species Lists**

Recommendation Rationale:

CO is the center of the distribution of this regional endemic. Also known from s WY, ne UT. Broadly distributed in the mountainous part of w CO. Relatively common in CO (39 records representing 30 sites); 2 of 5 locations in WY are historical and have not been reconfirmed. Habitat probably stable following historic declines due to grazing, hydrologic alternations and conversion to hayfields.
