Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)	<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/>	Not R2 SS and Not of Concern Now	<input type="checkbox"/> Insufficient Information Available to make a recommendation			
Recommendation Rationale					
<p>Species is distributed in the western Great Plains. In R2, it occurs on the Thunder Basin NG and Samuel McKelvie NF. Habitats are upland sites with unconsolidated sand substrate, and are discontinuous and patchy in distribution. Appears to be scarce are rare in R2, but well distributed outside R2. Threats include ORV traffic, non-native invasive plants, and quarrying. Because of the limited distribution and many “unknowns”, recommend for consideration as an Emphasis Species.</p>
