Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/> R2 Sensitive Species (SS)		<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists (AR and Routt)			
<input type="checkbox"/> Not R2 SS and Not of Concern Now			<input type="checkbox"/> Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>Region 2 is at the southern and eastern limits of the range of this species. Because the species occurs across a wide range of elevations and habitats (sagebrush, Douglas-fir and chokecherry), it does not appear to merit sensitive status. However, little is known of its abundance, vulnerability to habitat modification, or life history. No significant threats or concerns were identified Wyoming, but the paucity of information for Colorado indicates that this species should be considered as an Emphasis Species by the Routt and AR NFs.</p>					

Name/Title	Nancy Warren & Jeff Redders	Date	Oct. 1, 2002
