Sensitive Species Recommendation (Please check 1 box below)						
<input type="checkbox"/>	R2 Sensitive Species (SS)	<input checked="" type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists				
<input type="checkbox"/>	Not R2 SS and Not of Concern Now	<input type="checkbox"/> Insufficient Information Available to make a recommendation				
Recommendation Rationale						
<p>Widespread in prairies throughout the Great Plains and into Canada. Common in tallgrass prairie and open woodlands, able to persist in degraded sites and native prairie hay meadows. At edge of its range in CO and WY. Not well distributed and uncommon in CO. Threats may include livestock grazing and habitat loss and fragmentation of native tallgrass prairie. Recommended for consideration for other Emphasis Species lists.</p>
