<input checked="" type="checkbox"/>	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation			
Recommendation Rationale						
<p>Species occupies a wide variety of habitats including pine forests, woodland, dry rocky grasslands, and moist meadows. Frequent at low to mid elevations throughout the Black Hills area. One reference says this milkweed is the most common milkweed in the Hills proper. Ranges from northern tallgrass praires throughout the upper mid-west.</p>						

Name/Title	Kevin Atchley, Range Management Specialist Benjamin Madsen, Botanist	Date	October 1, 2002
