Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)	Not R2 SS, but should be considered for other Emphasis Species Lists			
<input checked="" type="checkbox"/>	Not R2 SS and Not of Concern Now	Insufficient Information Available to make a recommendation			
Recommendation Rationale					
<p>This plant is "a rare plant in the Great Plains but is common just to the west." In eastern Colorado it is characterized as "common in early spring on the mesas." In Wyoming, only 1 of 20 collections in 7 counties is possibly located within USFS boundaries. This plant is not tracked or ranked in Colorado. This plant has been found from Wyoming to New Mexico and east to Nebraska.</p>					
Name/Title	Kevin Atchley, Range Management Specialist Benjamin Madsen, Botanist	Date	October 2, 2002
