<b>Sensitive Species Recommendation</b>			(Please check 1 box below)			
<input type="checkbox"/>	<b>R2 Sensitive Species (SS)</b>		<b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>			
<input checked="" type="checkbox"/>	<b>Not R2 SS and Not of Concern Now</b>		<b>Insufficient Information Available to make a recommendation</b>			
<b>Recommendation Rationale</b>						
<p><b>This plant occurs in all Region 2 states although whether it is native to Colorado is debatable. Colorado and Wyoming are periferal to the distribution, which is basically everywhere in the United States except the cordilleran region. This plant frequents moist/disturbed habitats and the habitat is apparently stable if not actually increasing. It is considered common in South Dakota. Because of the wide distribution of this plant and its preference for disturbed habitats, we recommend that this species be listed as Not R2 SS and Not of Concern Now.</b></p>
