Sensitive Species Recommendation (Please check 1 box below)						
<input type="checkbox"/> R2 Sensitive Species (SS)		<input type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists				
<input checked="" type="checkbox"/> Not R2 SS and Not of Concern Now		<input type="checkbox"/> Insufficient Information Available to make a recommendation				
Recommendation Rationale						
<p>A unique local endemic known only from CO, on limestone and shale barrens of the Arkansas Valley. Not known to occur outside CO. Known from 19 occurrences, none on NFS lands, below 5500 ft between Canon City and Pueblo. Locally abundant, but restricted to a unique habitat. Two populations known to have been extirpated by residential development near the city of Pueblo. Not of concern because it is not likely to occur on NFS lands.</p>
