Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)		Not R2 SS, but should be considered for other Emphasis Species Lists		
<input checked="" type="checkbox"/>	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>Region 2 is at the western edge of the range of this species. It is known from eastern and central WY (S4), CO, NE and SD (SR) and from the Cimarron National Grassland in KS. It is a common species (e.g., 66 recent collections in WY), tolerant of disturbance, and trends appear to be stable to increasing.</p>
