| | Not R2 SS and Not of Concern Now | <input checked="" type="checkbox"/> | Insufficient Information Available to make a recommendation | | | |
| | | | | | | |
| Recommendation Rationale | | | | | | |
| <p>There is insufficient information on <i>Crataegus saligna</i> to make a recommendation on Sensitive Species status. This species is a CO endemic with 3 populations on the White River NF in R2. “It is likely very rare in R2” but no information is available on population sizes or abundance. Habitat is in stream corridors and along canyons but specific information on habitat is unknown. Stream corridors are very vulnerable to many threats. However, no information is available on threats to this species. This species may also be found off Forest Service lands but we do not have any information on size of populations or abundance of individuals. We need information on the impacts of different management activities on this species. Is any information available on resprouting ability after fire or other disturbances?</p> <p>Beth A. Burkhart and Gay Austin</p> | | | | | | |
