<input type="checkbox"/> R2 Sensitive Species (SS)		<input type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input checked="" type="checkbox"/> Insufficient Information Available to make a recommendation			
Recommendation Rationale					
<p>Insufficient information available to make a recommendation due to taxonomic questions between <i>D. spectabilis</i> var. <i>oxyloba</i> and <i>D. spectabilis</i> var. <i>spectabilis</i>. Before a recommendation can be made this needs to be understood!</p> <p>Both varieties have widespread potential habitat across CO, AZ, NM, and Utah (shrub, white fir, Ponderosa pine, spruce-fir, and alpine tundra). Demography is unclear because of the lack of details at the varietal level. If <i>D. spectabilis</i> var <i>spectabilis</i> is determined to be taxonomically distinct then this variety would occupy a much smaller known range comprised of fewer populations. Still, they are both rare.</p>					
<p>John Proctor and Gay Austin</p>
