| <b>Recommendation Rationale</b>                                                                                                                                                                                                                                                                                                                                                               |                              |                                                                                                 |                                                     |                    |                  |
| <p>Circumboreal species, widespread outside of R2. Occurs in boreal and subalpine meadows, bogs, swamps. One occurrence in the Black Hills may have been lost, and another is at risk. However, the evaluation focused primarily on SD and we have insufficient information on its status and threats throughout Region 2 to determine whether or not it merits sensitive species status.</p> |                              |                                                                                                 |                                                     |                    |                  |

|                   |                                                         |             |                               |
