Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/> R2 Sensitive Species (SS)		<input type="checkbox"/> Not R2 SS, but should be considered for other Emphasis Species Lists			
<input type="checkbox"/> Not R2 SS and Not of Concern Now		<input checked="" type="checkbox"/>	Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>Distributed through se CO and sw KS through w OK, e NM and w TX, into Mexico. It is found on wet sites in ditches, swales, and along watercourses. In R2, it is at the northern periphery of its range and is known from a few scattered populations here. It is associated with riparian habitats, but the evaluator speculates that habitat is largely stable in R2. In the original recommendation, the limited number of occurrences in R2 and association with riparian habitats led us to recommend sensitive status. However, upon review, we conclude that there is insufficient information available to determine whether or not sensitive status is warranted.</p>
