

Recommended Staffing

The holder's proposal should ensure adequate staffing to meet the requirements outlined in the prospectus.

The FS recommends that hosts/site managers be located at the sites listed below. A history of operations experience indicates that having personnel stationed at these sites during the peak season is very useful in providing the quality of services required to meet standards due to the complexity of operations which occurs at these sites. During the shoulder seasons the number of employees should be able to be reduced. The holder may find it useful to increase the number of hosts, depending upon his/her proposal and the services provided and may find it useful and efficient to retain additional employees who are assigned both landlord (GT) and tenant maintenance duties.

(NRRS means that the National Recreation Reservation Service is in use at the site)

Recreation Site

Hosts/Site Managers for peak season

Blue Mountain Campground	1 host (NRRS)
Buffalo Springs Campground	1 host (NRRS)
