<b>Sensitive Species Recommendation</b> (Please check 1 box below)					
<input checked="" type="checkbox"/>	<b>R2 Sensitive Species (SS)</b>		<b>Not R2 SS, but should be considered for other Emphasis Species Lists</b>		
<input type="checkbox"/>	<b>Not R2 SS and Not of Concern Now</b>		<b>Insufficient Information Available to make a recommendation</b>		
<b>Recommendation Rationale</b>					
This species is a local endemic known from only two sites: one on the San Isabel National Forest and one near the Pike National Forest. The habitat of this species may be affected by livestock grazing improvements to inhabited wetlands, and by off-road vehicle use which has been observed at one of the known sites.
