Sensitive Species Recommendation (Please check 1 box below)					
<input type="checkbox"/>	R2 Sensitive Species (SS)		Not R2 SS, but should be considered for other Emphasis Species Lists		
<input checked="" type="checkbox"/>	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation		
Recommendation Rationale					
<p>Pinus contorta is a very common and widely distributed species in North America, but has a few isolated disjunct occurrences in the Black Hills of South Dakota where the SD Natural Heritage Program ranks it as S2. There is no know threat to persistence at a Regional scale, and the species is not of concern at this time.</p>
