Dennis Jensen
Ranch Manager
Park Cattle Company

Dear Mr. Jensen,

This letter will document the Annual Operating meeting held between Park Cattle Company LLC, and the USFS, on April 6, 2011, and serve as your Annual Operating Instructions (AOI) for the 2011 grazing season on the Hope Valley C&H allotment. Those present included Dennis Jensen and Danny Nalder of Park Cattle Co., and Courtney Ghiglieri of the USFS. The use permitted in your Term Grazing Permit is listed below along with the authorized use for the 2011 season:

PERMITTED USE:

<u>Allotment</u>	<u>Number of Stock</u>	<u>Season</u>
Hope Valley C&H	103 cows/calves	6/25-10/25

AUTHORIZED USE:

<u>Allotment</u>	<u>Number of Stock</u>	<u>Season</u>
Hope Valley C&H	103 cows/calves	6/26-10/25

*South Hope Valley Pasture will be rested until a NEPA decision is made. This includes the gravel pit and meadows. T10N, R19E, Sections 6&7. Currently, data collection will begin in 2014 for this allotment.

Cattle enter the allotment through the corrals along Highway 89, then cross California State lands to Scott's Lake Unit. The permittee is responsible for obtaining permission to cross California State lands in the Pickett's Junction area. Once proper use is reached, trail cattle back across State lands to Highway 89. Cattle may be placed in the newly constructed holding pasture for no longer than 48 hours. Cattle will then be divided into two herds. 52 pair will be trailed to the Horsethief Canyon Unit; 51 pair will be trailed across California State land and trail above Willow Creek to the Horse Meadow Unit. Cattle will be removed from the allotment by trailing back to the corrals on Highway 89.

Actual turn on date will depend on range readiness. For the purpose of livestock accountability, **contact the district office five to seven days prior to turnout and when you make unit moves.** Please keep us posted about activities and conditions of the allotment. The District Ranger must approve any use outside the authorized numbers and season listed above in advance.

ALLOWABLE USE:

Hope Valley C&H:

Riparian sites:

- ✘ In meadows that are in early seral status (an early stage of succession in a plant community or vegetation type, generally characterized by plant species that are adapted to colonizing disturbed areas with a high proportion of bare soil) livestock utilization of grass and grass-like plants must be limited to **30 percent (or minimum six-inch stubble height)**.
- ✘ In meadows that are in late seral status (fifty percent or more of the relative cover of the herbaceous layer is late seral with high similarity to the potential natural community, a diversity of age classes of hardwood shrubs is present, and regeneration is occurring) livestock utilization of grass and grass-like plants must be limited to a maximum of **40 percent (or minimum four-inch stubble height)**.
- ✘ In meadows that are **degraded** (such as those in early seral status with a greater than **ten percent** meadow area in **bare soil and active erosion**) **total rest** from grazing is required until they have recovered and have moved to a mid or late seral status.
- ✘ In riparian areas browsing on mature riparian shrubs (including willow and aspen) is not to exceed **20 percent** of the annual leader growth and is not to exceed more than **20 percent** of individual seedlings. Remove livestock from any area of the allotment when browsing indicates a change in livestock preference from grazing herbaceous vegetation to browsing woody riparian vegetation.
- ✘ Disturbance of meadow-associated streambanks and natural lake and pond shorelines is not to exceed **20 percent** of the stream reach or **20 percent** of the natural lake or pond shoreline.
- ✘ Livestock grazing will be modified or suspended on meadow ecosystems when it is determined that ecological status is moving in a downward trend.
- ✘ Pesticide application to livestock is prohibited within riparian conservation areas and critical aquatic refuges.

It is your responsibility to monitor utilization and ensure that the allowable use standards are not exceeded. You are responsible for determining when allowable use has been reached and to

move or remove livestock from the allotment to prevent exceeding these standards. The Forest Service is responsible for monitoring your compliance with the allowable use standards. Because we do not know the ecological condition of every meadow located within the allotment, please err on the side of caution when monitoring utilization on riparian species.

RANGE IMPROVEMENTS:

Range improvements listed in your permit must be maintained to standards listed in Part 3 of your term grazing permit prior to livestock entering the allotments. If an improvement is inaccessible prior to the on date, you must notify staff in my office prior to livestock entry into the allotment. If there is a need for any additional improvements and/or major repairs to existing improvements, please contact the Carson Ranger District range staff for assistance.

GENERAL MANAGEMENT:

Forms for recording your actual use and range improvement maintenance costs are included with this plan. Please complete and return the forms by December 31, 2011.

Salt must be placed at least ¼ mile from water, (springs, seeps, and streams), roads, and trails. If you have questions about the placement of salt, contact the range staff and they will locate suitable sites with your input. Dead livestock must be moved at least 100 yards from water and from roads and trails used by the public. All garbage associated with managing the allotments must be removed from National Forest system lands.

If you see a wildfire, please contact the Minden Interagency Dispatch at **(775) 883-5995**.

Invasive weeds are becoming a serious threat to the welfare of our rangelands. Your assistance is needed to identify new outbreaks of weed populations and to prevent the establishment of weeds on the forest. Pay particular attention to areas where stock is concentrated such as loading/unloading areas, water developments, and salting areas. We have implemented a Noxious Weed Free Hay order on our Forest. This will require any hay that is brought onto the National Forest to be certified free from noxious weeds. It is *strongly* recommended that all livestock entering the National Forest be fed **Certified Noxious Weed Free Forage** for at least 3 days prior to entering the Forest.

The grazing fee is \$1.35 per head month.

Only cattle with the PC over bar on the right hip are authorized to graze on the Hope Valley C&H allotment.

Payment of your grazing bill is due five days prior to your earliest turnout date to allow time for processing. As a reminder the Forest Service is required to give permittees a minimum of 30 days to pay your grazing fees. The Forest Service is requesting that permittees schedule their AOI meeting a minimum of 35 days prior to their earliest on date to provide adequate time to plan for the upcoming grazing season.

As a reminder, approval of requests for permittee convenience nonuse is not automatic and the authorized officer should discuss the reasons for the nonuse request with the permittee. Approval of a request for permittee convenience non-use must be in writing by the authorized officer. Full or partial permittee convenience nonuse may be approved by the authorized officer for no more than three consecutive years and not more than four years in any ten year period.

Other:

This summer we will be visiting the allotment to conduct permit compliance monitoring and would like to provide the opportunity for you to join us during these efforts. Our range staff, Courtney Ghiglieri, will contact you at least 72 hours prior to a scheduled allotment visit to discuss times and dates with you if you are interested in attending.

The Carson Ranger District OHV staff will be evaluating the user created road/camp site along the creek in horse meadow, as well as put up signs to deter the public from using that site. The Forest Service will put in a request to the road crew to clean out the cattle guards throughout the allotment. Cattle Guard maintenance should occur in summer 2011, or 2012.

If you have any questions regarding these instructions or any aspect of grazing on the National Forest, please call our Range staff, Courtney Ghiglieri at (775) 844-8150.

Sincerely,
